

Full Stack Lead Developer (full time)

Who we are and what we do:

Keluro is an innovative startup offering solutions to facilitate handling the vast amount of email that companies have to deal with on a daily basis. We are developing an application with native Microsoft Office 365 integration that enables users to effortlessly retrieve and share emails and the information contained therein.

Being a Lead Developer at Keluro:

As a successful candidate with relevant prior experience, you will work in an environment where the term “Big Data” is not only a buzzword. Given the variety of tasks and projects you will be working on—together with other top developers—, you will work in a truly stimulating environment offering you steep and continuous learning curve. Last but not least, at Keluro we work with the latest and most innovative tools to ensure superior product quality, but also to create a comfortable and productive environment for our developers.

What we look for:

We are looking for an experienced developer to work directly under our CTO and co-founder. You will develop a deep understanding of and work with the entirety of the technology stack used by Keluro: this spans front-end development to background tasks involving machine learning processes hosted in the cloud. Your creative and inventive mindset will help to enhance our product from both a purely technical and a user experience point of view.

Required qualifications:

- Master’s degree in a relevant field
- Significant experience in the development of single page applications
- Demonstrated track record of designing and implementing scalable backend services (ideally in C#/.NET)
- Advanced knowledge in the field of development and software engineering
- Good understanding of IT administration; experience with an Azure-type cloud provider is a plus
- Good level of English

With native integration in Microsoft Office 365, Keluro is essentially built on a Microsoft technology stack. Below you will find some of the technologies you will be exposed to. While prior experience in any of the following is not a prerequisite, we expect you to quickly get familiar with them: Git/ GitHub/ TeamCity; Microsoft Office 365; TypeScript; C# .NET/ Asp.NET WEB API; Sass; Microsoft Azure; DocumentDB/ Azure SQL Server.

Compensation:

€45k - 50k p.a., negotiable depending on profile

To apply, please send your CV and a short email introducing yourself (max. 200 words) to contact@keluro.com. We look forward to hearing from you!
